

ABSTRACT

- An innovative product with societal acceptance is the one that aids the comfort, convenience and efficiency in everyday life.
- Purchasing and shopping is becoming daily activity. The project "Mart Billing System" is an application that automates the process of ordering and billing in a "Departmental Store".
- It makes an easy to use environment for Cashier and customer.
- In present billing system shopkeepers are manipulating the customer by giving out any item of the same price instead of exact change.
- To avoid this problem the change will be stored in the customer's account. On the customers next visit or any other visit the customer can use his/her change money.
- It also provides the customer with the benefit of **reward points**.
- On every 500 rupees of purchase the customer will be awarded 2 points.
- Also on every purchase above rupees 5000/- 5 extra bonus points will be given to the customer.
- The points will be stored in the customer's account. The reward points can be used to avail a discount of 2% on every 50 points within a span of four months.
